The Chinese University of Hong Kong Department of Linguistics and Modern Languages First Term, 2023-2024

Course Title LING5101B Foundations in Linguistics I: Phonetics and Phonology

Description

This course introduces students to a unified approach to language as a complex structure represented in the minds of its speakers. Empirical linguistic data will be drawn across languages to enable students to understand the intimate relation between language and the human mind. On the basis of this understanding, students are led to explore the core areas of linguistics. The exploration starts with natural language sound systems and phonological components of grammar. These will be explained with basic concepts and recent theoretical advances in linguistic studies alongside new findings in language acquisition. Students will learn to apply these concepts and ideas to tackle linguistic problems.

Phonetics is the systematic study of how human speech sounds are produced in the vocal tract, transmitted through the air, and perceived by the human ear and brain. While phonetics can be studied in various ways, this course will mainly adopt an impressionistic approach.

Phonology is the study of sound patterns in language. While closely related to phonetics, phonology has a different focus: it is concerned with the function, behavior and organization of speech sounds as linguistic units, rather than the production, perception and classification of speech sounds as physical entities.

This course is designed to introduce students to the basic concepts in phonetics and phonology, and to develop their understanding of the importance of phonetics and phonology in language studies and language-related sciences. Students will learn how to recognize, produce, transcribe, classify speech sounds, and analyze sound patterns.

Content, highlighting fundamental concepts		
Topic	Contents/fundamental concepts	
Physiology of speech	The vocal tract and articulatory organs, the ear, the brain	
Speech initiation	Pulmonic, glottalic, velaric mechanisms	
Speech phonation	Glottal settings and phonation types	
Speech articulation	Places and manners of articulation, double and secondary articulations	
IPA	The organizing principles of the IPA, broad and narrow transcription	
Distribution	Complementary / parallel / defective distribution, free variation	
Phonological units	Segmental & suprasegmental units, distinctive feature, phoneme, allophone	
Phoneme sequences	Consonant clusters, vowel hiatus, phonotactics	
Syllable structure	Onset, rhyme, nucleus, coda, sonority	
Phonological processes	Palatalization, velar softening, spirantization, syncope, apocope, etc.	
Phonological representation	Surface representation, underlying representation, rules, rule ordering	
Phonological acquisition	Fronting, glottaling, stopping, coalescence, etc.	

Learning outcomes

By the end of the term, students should be able to:

- 1. Classify speech sounds according to articulatory criteria;
- 2. Use phonetic transcription to learn the pronunciation of new words;
- 3. Recognize and analyze the phonological structure of the word;
- 4. Apply phonological concepts to data analysis.

Learning activities

- 1. Classification of speech sounds
- 2. Perception
- 3. Transcription
- 4. Pronunciation
- 5. Data analysis

Grac	Grade descriptor		
A	Outstanding performance on all learning outcomes. A thorough grasp of the subject as demonstrated by consistently high marks of the assignments, quizzes and transcriptions. Ample evidence of familiarity with relevant reading. Students can apply the knowledge in analyzing new speech data accurately.		
В	High performance on some learning outcomes which compensates for less satisfactory performance on others, resulting in overall good performance. A generally good grasp of the subject as demonstrated by good marks of the assignments, quizzes and transcriptions. Some evidence of familiarity with relevant reading. Students can generally apply the knowledge in analyzing new speech data.		
C	Satisfactory performance on some learning outcomes, possibly with a few weaknesses. A basic grasp of the subject as demonstrated by average marks of the assignments, quizzes and transcriptions.		
D	Barely satisfactory performance on a number of learning outcomes. Insufficient grasp of the subject as demonstrated by poor marks of the assignments, quizzes and transcriptions.		
F	Unsatisfactory performance on a number of learning outcomes, or failure to meet specified assessment requirements.

Assessment		
Task nature	Description	Weight
Weekly assignments	Group assessments	30%
	(No more than 3 students in each group)	
Midterm tests	Individual assessments	30%
Oct 16	(1 hour each)	
Nov 13		
Final exam	Individual assessment	40%
Dec 4	(3 hours)	

Course schedule

Week	Date	Topics and Readings
1	September 4	Introduction; phonetics and phonology; branches of phonetics; word,
		morpheme, syllable, stress, segment; IPA symbols; consonants and vowels;
		transcription and spelling.
		Reading: Chapters 1, 2 & 5, Davenport and Hannahs (2020)
2	September 11	Segmental units I: places of articulation, voicing, IPA consonant chart,
		airstream mechanisms, phonation types,
		Reading: Chapters 3 & 5, Davenport and Hannahs (2020)
3	September 18	Segmental units II: manners of articulation; IPA consonant chart
		Reading: Chapter 3 & 5, Davenport and Hannahs (2020)
4	September 25	Segmental units III: vowels; height, advancement, rounding, cardinal
		vowels; IPA vowel chart
		Reading: Chapter 4 & 5, Davenport and Hannahs (2020)
5	October 9	Suprasegmental units I: syllable, stress, rhythm, weak forms, phonotactics
		Reading: Chapter 6, Davenport and Hannahs (2020)
6	October 16	Midterm test 1 (coverage: Units 1-4)
		Suprasegmental units I: tone, intonation
		Reading: Chapter 6, Davenport and Hannahs (2020)
7	October 25	Distinctive features
	Wednesday	Reading: Chapter 7, Davenport and Hannahs (2020)
	9.30am-12.15pm	
8	October 30	Phonemic analysis, phoneme, allophone, levels, functional load
		Reading: Chapter 8, Davenport and Hannahs (2020)
9	November 6	Phonological processes, alternations, rules, neutralization
		Reading: Chapter 9, Davenport and Hannahs (2020)
10	November 13	Midterm test 2 (coverage: Units 5-8)
		Phonological structure, feature geometry, underspecification, autosegments
		Reading: Chapter 10, Davenport and Hannahs (2020)
11	November 20	Phonological acquisition, contrastive analysis, error analysis, interlanguage
		Reading: Chapter 10,
12	November 27	Derivational analysis, abstractness, rule ordering
		Reading: Chapter 11, Davenport and Hannahs (2020)
13	December 4	Final examination
	1

Details of course website

A Blackboard account has been set up for students to access information of the course. LING5101A on Blackboard eLearning System: https://blackboard.cuhk.edu.hk/

Academic honesty and plagiarism

Attention is drawn to University policy and regulations on honesty in academic work, and to the disciplinary guidelines and procedures applicable to breaches of such policy and regulations. Details may be found at http://www.cuhk.edu.hk/policy/academichonesty/.

With each assignment, students will be required to submit a signed declaration that they are aware of these policies, regulations, guidelines and procedures. For group projects, all students of the same group should be asked to sign on the declaration.

For assignments in the form of a computer-generated document that is principally text-based and submitted via VeriGuide, the statement, in the form of a receipt, will be issued by the system upon students' uploading of the soft copy of the assignment. Assignments without the receipt will not be graded by teachers. Only the final version of the assignment should be submitted via VeriGuide.
